

Introduction

The objective of this project is to perform Exploratory Data Analysis (EDA) on the dataset to identify patterns, trends, distributions, and potential outliers. This analysis helps transform raw data into meaningful insights that support decision-making.

Basic Statistics

The dataset contains 1200 records. Basic descriptive statistics such as count, mean, median, minimum, and maximum values were calculated for the key numerical columns.

A	B	C	D	E	F	G	H
TotalPrice		Quantity		UnitPrice		ItemsInCart	
Mean	1053.9683	Mean	2.945833333	Mean	356.41275	Mean	5.485
Standard Error	23.66722023	Standard Error	0.040632673	Standard Error	5.692013928	Standard Error	0.065875184
Median	823.615	Median	3	Median	364.21	Median	5
Mode	635.9	Mode	1	Mode	127.18	Mode	5
Standard Deviation	819.8565584	Standard Deviation	1.407557099	Standard Deviation	197.1771464	Standard Deviation	2.28198332
Sample Variance	672164.7763	Sample Variance	1.981216986	Sample Variance	38878.82707	Sample Variance	5.207447873
Kurtosis	-0.040414717	Kurtosis	-1.294595887	Kurtosis	-1.191010928	Kurtosis	-0.708552065
Skewness	0.891359083	Skewness	0.027922314	Skewness	-0.026511641	Skewness	0.0008768
Range	3445.01	Range	4	Range	688.54	Range	9
Minimum	11.39	Minimum	1	Minimum	11.39	Minimum	1
Maximum	3456.4	Maximum	5	Maximum	699.93	Maximum	10
Sum	1264761.96	Sum	3535	Sum	427695.3	Sum	6582
Count	1200	Count	1200	Count	1200	Count	1200

Trend Analysis

Several trends were identified through data visualization and pivot table analysis.

Outlier Analysis

The Total Price distribution was examined to identify unusual values. A small number of transactions showed significantly higher values compared to the majority of records, indicating potential outliers.

key Insights

The dataset contains 1200 orders.

Certain categories contribute more to overall sales than others.

Sales performance varies across products.

A small number of transactions have exceptionally high values.

The dataset provides useful business insights for future analysis.

Conclusion

The exploratory analysis successfully identified important trends, distributions, and outliers within the dataset. These findings can support further reporting, dashboard development, and business decision-making.
